To whom it may concern,

It is my great pleasure to recommend Yehyun Lee for the scholarship. I have known Yehyun for five months in my capacity as a teacher at Silverthorn Collegiate Institute. Yehyun was in my virtual Grade 12 Calculus class this semester, earning a remarkable grade. During this time, I have observed an outstanding growth in his personal, leadership and academic pursuits.

As Yehyun's teacher, I have witnessed his ability to quickly grasp concepts in Calculus and apply them to real world situations. Throughout the semester, he has achieved high grades and demonstrated outstanding collaborative skills, class participation, and initiative to further excel his understanding of calculus and vectors. His calculus final project where he had to learn and design a lesson in a group setting based on lines and planes was very impressive. He clearly portrayed his knowledge and engaged his audience in solving and understanding properties of planes. Furthermore, his active leadership roles in class activities have demonstrated his initiative to strengthen his critical thinking and problem-solving skills.

Yehyun's academic accomplishments are rivaled only by his personal and leadership qualities. He is creative, organized, compassionate, kind, and hard working. He takes the initiative to provide support and assistance to his peers whether it is academic or emotional. As a team player he always takes the initiative to provide guidance to his peers for meeting expectations of a task within the required deadline. He has shown utmost respect towards me and his peers by following school and virtual classroom guidelines.

I highly recommend Yehyun Lee for the scholarship. I believe that he is a worthy candidate with a lifelong passion for learning and facing new challenges with optimism. Please feel free to contact me if you have any questions regarding his leadership qualities or academic work.

Sincerely,

Samroze Chaudhry
Math and Physics teacher
